Professional Experience

Eva Protect

Co-Founder & CTO

Guadalajara, Jalisco

Oct 2025 - Present

- Co-founded a B2B fleet safety & telematics startup; led all technical decisions and product development from 0 → production.
- Designed and built a multi-tenant SaaS platform (organizations, vehicles, real-time GPS/IoT ingestion, safety events, fuel analytics).
- Developed BI module with dashboards, automated reports (PDF/XLSX), and email delivery pipelines.
- Architected scalable backend (Node.js/Fastify, PostgreSQL, Redis) and frontend (Next.js, TypeScript).
- Managed infrastructure on AWS (EC2, S3, RDS), Nginx, deployments, and performance optimization (pagination, caching, asset delivery).
- Implemented authentication, role-based access, and subscription logic.

Consultoría AS

Full-Stack Engineer

Guadalajara, Jalisco

Sep 2025 - Present

- Hotel platforms: reservations, billing, and day-to-day operations for hospitality clients.
- Real-time water monitoring for utilities — consumption tracking and anomaly detection.
- AWS (S3, RDS, EC2) for reliable environments and deployments.
- Performance-minded web apps and REST APIs, frontend to backend.

Multiburó

Full-Stack Developer

Guadalajara, Jalisco

Mar 2025 - Jul 2025

- Development of internal tools and administrative dashboards using React, Redux, and TypeScript, leveraging Ant Design for clean and responsive interfaces.
- Development and maintenance of REST APIs with Django, following a modular structure to organize endpoints, models, and services.
- Implementation of CRUD operations for managing internal data and administrative tables.
- Collaboration in an agile environment, participating in daily stand-ups and rapid iteration cycles.

IntouchCX (former Beliveo)

Software Developer Specialist

Guadalajara, Jalisco

Abr 2022 - Mar 2025

- Development of multiple internal applications using React, Redux, and TypeScript to build dynamic and responsive interfaces.
- Implementation of real-time features using Socket.io and GraphQL Subscriptions.
- Integration of external APIs (such as Google Maps and META) for location-based services and social media tools.
- Management and optimization of databases using Sequelize and Prisma, improving performance and scalability.
- Deployment of solutions using AWS services: S3, RDS, EC2, and CodePipeline.

ZF Suspension Technology

Project Engineer

Guadalajara, Jalisco

Jul 2018 - Jan 2022

- Worked on industrial automation and monitoring systems (sensors, PLC logic, diagnostics).
- Integrated data logging and alerting systems for equipment performance and fault detection.
- Collaborated with cross-functional teams to improve production reliability and reduce downtime.

Skills

- React, Redux, TypeScript, JavaScript
- Django, GraphQL, Sequelize, Prisma
- REST APIs, CRUD Operations, Django
- AWS (S3, RDS, EC2, CodePipeline)
- Tailwind CSS, Material UI, Ant Design, ShadCN UI
- React Native, Next.js
- Git, Agile, CI/CD
- Problem-solving

Languages

- Spanish (native)
- English (fluent)

Education

Universidad de Guadalajara
Software Engineering

Guadalajara, Jalisco
Ago 2013 - Jul 2018
